

Legal Studies A/T

Legal Studies explores the law, and its institutions and processes, in a social, economic and political context allowing students to investigate, question, and evaluate their personal view of the world and society's collective future.

Students develop their knowledge and understanding about how legal systems impact on the lives of citizens, seek to balance the rights and responsibilities of individuals, the community, and governments, in an effort to achieve justice and equality for all. Students will evaluate the effectiveness of laws, institutions and processes, and consider opportunities for reform.

Legal Studies provides students with the opportunity to develop their skills in research, analysis and evaluation of information. Through the use of logical and coherent arguments, students will explore the implications and consequences of decisions made by individuals, organisations and governments. Students will communicate their insights in a range of modes and mediums.

It is designed for students contemplating the law as a career. This subject is equally appropriate as a preparation for further studies in Economics, Business, Accounting, History, Sociology and Global Studies.
