

Global Classroom

Are you interested in international issues, global citizenship, meeting people, leadership opportunities and making a difference?

Then Global Classroom is for you!

Global Classroom

Global Classroom (GC) is a registered unit (students are given credit points towards their Senior Secondary Certificate) offered exclusively in Australia at UCSSC Lake Ginninderra.

About the Global Classroom organisation

Global Classroom is an ongoing project run exclusively in Australia at UCSSC Lake Ginninderra in conjunction with the Scottish Department of Education. Global Classroom is an independent educational organisation that networks schools around the world - it involves shared learning among its schools, the ethos being that students can "learn locally" but "think globally". The program aims to create an innovative network of schools that are committed to achieving systematic and sustained change.

Post-School Gap Year Opportunities

Global Classroom participants may extend their international involvement by joining the Global Active program (GAP).

www.shetland.gov.au

You can further your international contribution by joining a team of other gap year students, travelling to and doing extended school based projects in the international partner schools over several months.

How do you start?

Choose Global Classroom as an additional unit when you are selecting your subjects.

In Class: Students work on various educationally themed and conference-related projects as set out by Global Classroom conference organisers. See website: Gcc2017.weebly.com

A website is usually created by the conference organisers for the year. An archive of all student files and videos created by the Global Classroom group at UCSSC Lake Ginninderra is maintained at the college.

International Conferences

Each year there is an international Global Classroom Conference hosted by the various associated schools. The 2015 conference was in the Shetland Islands, UK, in 2016 the conference was in New Jersey in the USA. In 2017 UCSSCLG hosted the conference here in Canberra. In 2018 the conference will be in Sweden.

Coordinators: Matthew Phillipps, Amanda Kabaila
