

Extracurricular Science Opportunities

Health, Medical & Applied Sciences Program

This Program provides students with knowledge and experiences that will enhance their opportunities to transition into study and work in the areas of Health, Medical & Applied Sciences by:

- **Guidance** in the form of a program of study at college to achieve their goals.
- Access to **support** from teachers.
- Opportunities to **participate in forums and excursions.**
- Opportunities to **meet with professionals.**
- **Work Experience**

Participating students will **gain knowledge, experience and confidence** in making choices about their future.

Extracurricular Science Opportunities

Great Science Adventure!

A yearly excursion by the Sciences faculty, for keen science students.

Goals include:

- improving students' knowledge of potential careers in science
- fostering friendships among like-minded students.

The experiences change each year and include activities such as **discovering fossils**, learning about **deep space exploration**, **camping at the zoo**, **agricultural** tours and **exploring caves** in some spectacular underground sites.
