

Photography A/T

Photography A/T Specialised Photography A/T

Photography plays a large role in contemporary life, used and experienced every day in all modes of visual communication including advertising, social media, and television. Selecting photography as part of a college package gives a student the opportunity to creatively explore digital and darkroom technologies, develop skills in visual communication and explore new ways of story telling through imagery.

Students planning a career in a photographic field will have the opportunity to assemble a folio of work suitable for employment purposes or further study.

Photography A and T are designed to provide a firm basis of knowledge for aspiring photographers and for students studying related visual communication courses. Both courses give students scope for serious study of all aspects of black and white, digital and colour photography.

Photography A

Photography A has a practical emphasis. Students doing the A course are expected to undertake research assignments, modified to engage the students in aspects of written research.

The theory, skills and concepts are the same as in the T course and are ideal for students wanting to add a creative subject for balance in their package.

Photography T

In the Photography T course students are expected to undertake research related to various aspects of photography, and complete the same practical projects as students in Photography A.

Course Patterns

A minor or major can become a major minor or double major if units from Specialised Photography are studied in addition to Photography.

Units—Photography A/T

- Creativity in Photography
- Communicating Meaning in Photography
- Photography in Context
- Narratives in Photography
- Independent Study

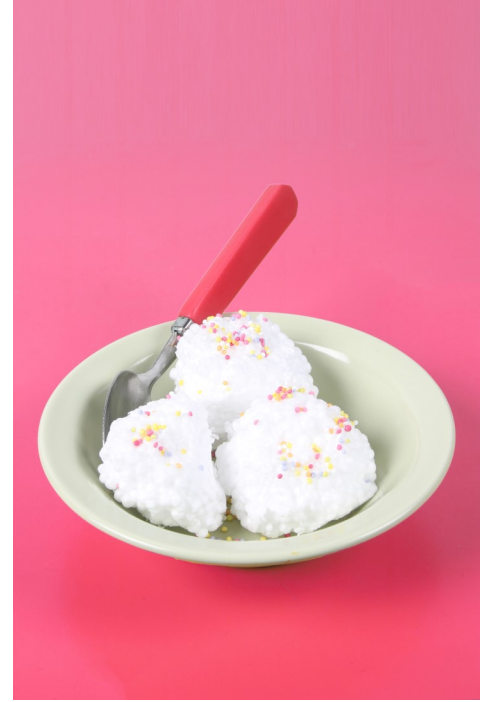

Units—Specialised Photography A/T

- Innovation in Photography
- Photographic Exhibitions
- Entrepreneurship in Photography
- Interdisciplinary Inquiry in Photography
- Independent Study.

See the Curriculum Handbook for more details about each of the units.

Note regarding Independent Study units

An Independent Study unit must be proposed by an individual student, be for

their own independent study, and negotiated with their teacher.

Students must have studied at least three standard 1.0 units from this course.
